Handmade solid wood cabinet doors

Our solid wood cabinet doors can be supplied in solid pine, knotless pine, paulownia, tulip wood, oak, walnut or any other wood specified.

The choice of wood will depend on the application and budget. Please see below a list of the wood we use to make solid wood kitchen doors.

- **Pine** is an affordable material with the strength to support a kitchen cabinet. It is a soft wood which makes it malleable and easy to work with.
- **Knotless pine** is used as an alternative to pine when a painted finish is preferred. There is no need to be concerned that the knots will bleed through the paint over time.
- **Paulownia** Asian hardwood is a real eco-friendly light weight timber. Finished Paulownia has a similar appearance to oak but it is significantly cheaper.
- **Tulip wood** due to its impressive strength and natural qualities, is used in a wide range of furniture manufacturing, including kitchens.
- **Oak** is attractive in appearance, durable and strong and it is used mainly in applications where low maintenance is expected.
- **Walnut** has good balance of environmental and eco-friendly nature. The texture of the wood grain is very individual and lively. It is durable with an expected lifespan of 150 plus years.

Double unit fitting kit £8.25 per set

Finishing service

Finishing service & paint colours stocked (paint not doors)

All our kitchen doors, drawers fronts and end panels are supplied in natural wood, additional preparation might be required prior to finishing. After receiving delivery, it is the customers responsibility to store the cabinets, doors, drawer fronts and panels properly.

Unfinished items will need to be finished immediately to avoid splitting, bowing or wood movement. Failure to handle, store or finish the items properly will invalidate the warranty of the items supplied.

We offer a bespoke spray paint finish matched to any RAL or Farrow & Ball colour, Although painted items are flattened between coats and we do apply a minimum of 2 primer coats and 2 top coats, a 100% flat finish cannot be guaranteed on solid wood, grain and minor imperfections might remain visible.

Our paint or lacquer finish is a soft satin (20% sheen), we can offer a different sheen % to increase or decrease the shine of the finish, we do not offer a gloss finish on solid wood.

When a clear lacquer, stain or wax is applied, shade/grain differences remain visible between sections of the wood. Colours and shades might vary from the colour charts or online images used. Different batches of paint might have a different colour shade and therefore might not match previously painted, lacquered, stained or waxed items.

Wood is a hygroscopic material, items when finished might require remedial work once they have climatized to their new environment, any site visits to carry out remedial work to finishing, return or redelivery costs will have to be paid for by the customer.

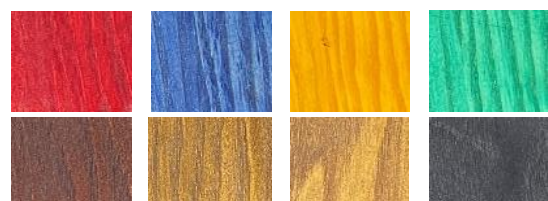

Stock paint | lacquer | stain finishes

None stock paint finishes
