Transition Click Fit™

What our customers say about our solid wood Transition click fit frames fitted on new off the shelf cabinets.

Just attaching some images of the kitchen as requested. Still some last minute touch-ups & odd jobs to do, but it's all fitted & we love it. Thank you for all your help & support & of course your beautifully crafted kitchens.

We will hopefully have created the 'wow' kitchen to help sell our cottage. If we need a new kitchen in the next house, I won't be looking anywhere else but Yorkshire Pine Factory.

Thanks once again. Lynn R.

In house finishing service

All our kitchens and furniture are supplied in natural wood finished using 120 grid sandpaper, additional preparation might be required prior to finishing the units. After receiving delivery it is the customers responsibility to store the cabinets, doors and panels properly. Unfinished or exterior finished only units will need to be finished immediately to avoid splitting, bowing or wood movement. Failure to handle, store or finish items properly will invalidate the Yorkshire Pine Factory warranty.

Our in house hand or spray paint finishing service uses a quality eco-friendly paint matched to any RAL or Farrow & Ball colour, primer is matched to the colour of the top coat specified. A 2 pack paint option is available on request. For a painted finish we recommend the use of a knotless wood. Primer is spray painted but customers can specify a hand paint or spray paint finish for the top coat. All painted units are flattened between coats and we do apply a minimum of 2 primer coats and 2 top coats.

For a natural look we recommend either a clear lacquer or hand paint finish. To obtain a flatter smoother finish we recommend a spray paint finish. A 100% flat finish cannot be guaranteed on solid wood, grain and minor imperfections might remain visible. Our paint or lacquer finish is a soft satin (20% sheen), we can offer a sheen % to increase or decrease the shine of the finish, we do not offer a gloss finish.

Customers can specify or supply their own paint, lacquer, stain or wax. As an alternative to a hand or spray paint finish YPF offers a lacquer, stain or wax finish. When a clear lacquer, stain or wax is applied, shade/grain differences remain visible between sections of the wood.

For an additional charge units can be painted in a combination of colours, e.g. painted exterior and clear lacquer interior. For an additional charge we can paint different units in different colours, base units, wall units and kitchen island units can either all be painted in the same colour or in a combination of colours.

Wood is a hygroscopic material, items when finished might require remedial work once they have climatised to their new environment, any site visits to carry out remedial work to finishing, return or redelivery costs will have to be paid for by the customer.
